Workshop theme Eclipse was initially designed as an integrated development environment (IDE) for object-oriented application development. Today Eclipse is an open source community whose projects are focused on building an open development platform comprised of extensible frameworks, tools and runtimes for building, deploying and managing software across the lifecycle. This workshop is the sixth yearly meeting of the Italian Eclipse Community which includes universities, public institutions and industries, researchers and practitioners, students and professionals, all joined by the interest in promoting, experimenting, extending, and supporting the Eclipse platform. The Eclipse-IT 2011 will host three tracks:

- **Technical** track for research papers with a standard presentation at the workshop.
- **Student** track for practical experience report, plug-in and demo related to the Eclipse technology, with a presentation or live demo at the workshop.
- **Public Institutions (P.A.)** or **Industry** track with a short paper or demo and the presentation at the workshop.

The best student papers will be awarded during the workshop. The awards will be announced on the web site.

**Topics:**

**Eclipse Open source ecosystem and E-learning**
- Eclipse intelligent resources
- Eclipse intelligent projects
- Eclipse intelligent environment
- Applications
- Case studies and best practice
- Eclipse community for e-learning

**Jazz ecosystem**
- Projects managements
- Jazz and cooperative works
- Jazz intelligent knowledge management
- Intellectual capital management
- Case studies and best practice
- Jazz community for e-learning

**Eclipse, Open source and PA**
- Intellectual property
- Open source and PA
- On-going projects
- Case studies and best practice

**Submissions.** Submitted papers will be reviewed by the Program Committee, on the basis of the contribution to the workshop theme, the novelty of the work, and the quality of presentation. Submission is open for all, including the PC members and organizers. Only relevant work will be accepted for presentation and publication. Accepted papers will be published with an ISBN code. Authors are invited to submit their contribution via electronic submission on the EasyChair Conference Management System.

Manuscripts of all tracks should be formatted in the LNCS Proceedings style (see [http://www.springer.com/computer/lncs?SGWID=0-164-6-793341-0](http://www.springer.com/computer/lncs?SGWID=0-164-6-793341-0)).
